Think-tion™

HBDI™

Think-tion™ Workshops:

This interactive workshop will give you a chance to understand how ***Thinking*** and ***Actions*** are integrated together. In previous cognitive models and business applications the philosophy is that we have Situations that lead to Actions which can lead to exceptional Results. The premise of the Thinking required is completely missed and disconnected. What is proposed with ***Think-tion***™ is the ability to **Think** like a **STAR** (Situation-Thinking-Action-Result) and assure the Thinking Pattern is connected and aligned.

- Understand how the **HBDI**™ Personal Thinking Preference Whole Brain methodology can provide a powerful model for understanding yourself and others.

- Understand how the ***Think-tion***™ model combines the necessary Thinking-to-Action Flows to allow STAR Thinking which will align predictable Value Expectations.

- Assure Organizational Values are elevated and included in Action Flows associated with Leadership, Accountability, Learning, Passion, Fun and Opportunities matrixed by Thinking Flows for Strategy, Planning, Feeling and Innovation.
